

How to Explain

The Ratchet

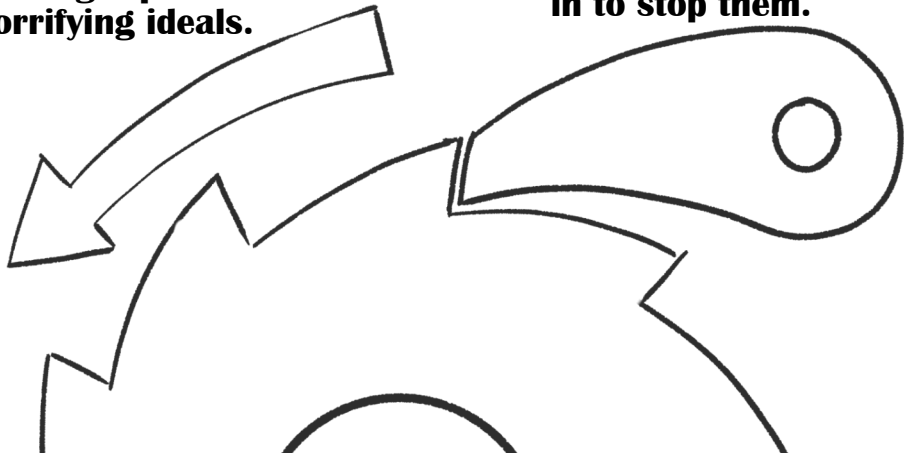

**Why centrism isn't
enough to keep us safe**

A Ratchet is a toothed wheel with a spring-loaded finger called a pawl. Together, they only allow movement in one direction.

In politics, it looks something like this:

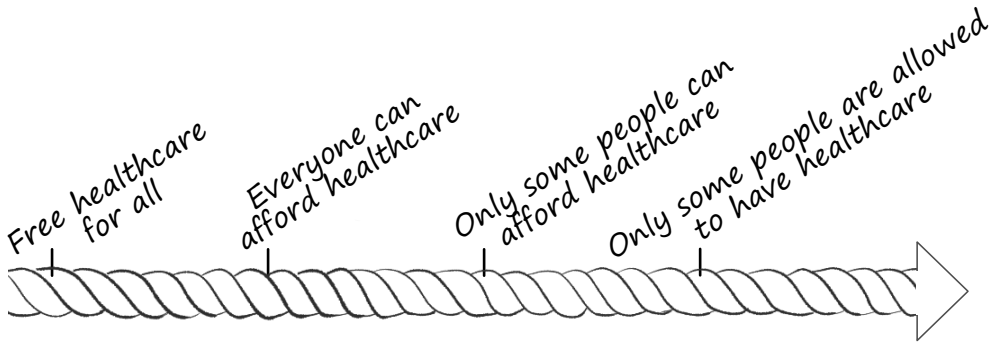

**The Right pushes towards
horrifying ideals.**

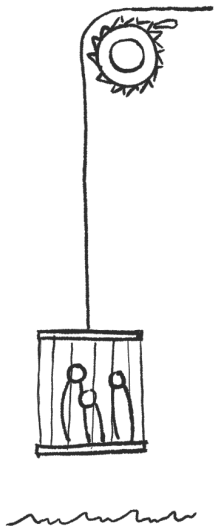

**Democrats dig
in to stop them.**

**Without an opposite
movement to counteract it,
any minor victory for the
Right becomes locked in,**

**And slowly, surely,
society drifts right.**

In order to stop the Right, we need more than to keep things the same. We need to pull Left.

So even if we don't support the same policies,

we need to all pull together.

Because together, we can all keep each other safe from

the Ratchet.
