Learn who's pulling with you:

How to Explain **The Ratchet**

**The Right pushes towards
horrifying ideals.**

**Democrats dig
in to stop them.**

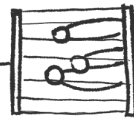

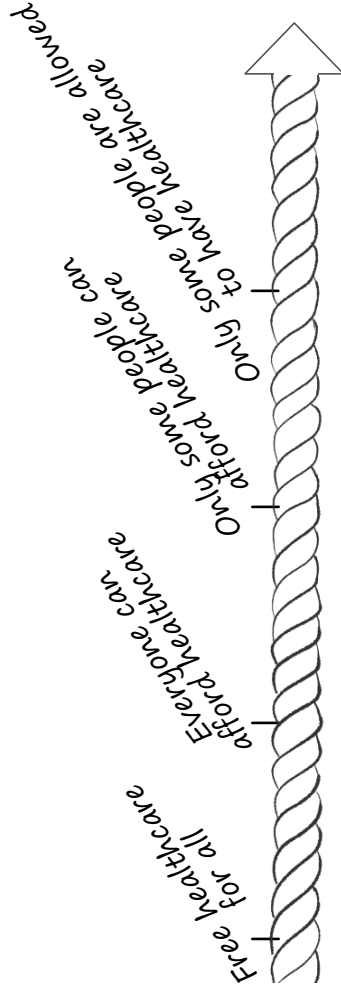

In politics, it looks something like this:

**A Ratchet is a toothed wheel with a spring-loaded finger
called a pawl. Together, they only allow movement in one
direction.**

**Without an opposite
movement to counteract it,
any minor victory for the
Right becomes locked in,**

society drifts right.

And slowly, surely,

**In order to stop the Right, we need
more than to keep things the same. We
need to pull Left.**

**So even if we don't support the same
policies,**

we need to all pull together.

**Because together, we can all keep each
other safe from**

the Ratchet.
